Lt. Col. John W. Parrell District Commander Office of Special Investigations Carswell Air Porce Base Port Worth, Texas

RE: UNIDENTIFIED PLXING OBJECT OVER GUAM, September, 1950; DAVID HUGHES BENNETT, - INFO:MANT

Dear Colonel Parrell:

by letter dated January 2h, 1958, advised he had some information he desired to report. Upon being contacted, he advised an agent of this office that in September, 1950, near Agana, Guam, he observed an unidentified flying object just off the shore of that island. He stated it was circular, flat, and about 600 or 1000 feet wide. It appeared to be about half a mile from shore and was about 300 feet above the surface of the water.

B stated that a white cloud covered part of the object and he saw open portholes in the object, from which blue gas was coming out. He stated he does not know whether the cloud was already there or whether the gas was formed from the flying object.

sketch was drawn up on March 13, 1958, while awaiting interview with the PBI representative.

The above-mentioned sketch is enclosed herewith for your in-

porting this incident. In about 1952, he wrote to the Air Technical Intelligence Command at an air base in Ohio, name not recalled, but he has never heard from his communication. About two years ago he again wrote to that agency but heard nothing.

15038 000 000344 1

AFHQ Form 0-86 dtd 27 May 58, Subj: UFO Report Submitted by FBI - Mr. D. H. Bennett, Dallas, Texas (Cont'd)

- d. Although an Air Force Command was on the island, we question the reason why Source waited two (2) years before reporting the incident to the Air Force, and again (now) eight (8) years later.
- e. ATIC files do not indicate any correspondence or report under individuals name.
- f. Based on many similar reports and cases, we are of the opinion that Source is somewhat of an eccentric (note agents report: "someone stalking him," and inference of "three-fourths dead"), and with strong suggestions of being a publicity seeker.
- 2. Due to the many varied and odd cloud formations found over the Pacific, numerous UFO reports have been received from that area. It is possible that Source may have observed a rare form known as a "lenticular -alto cumulous", with the alleged sighting reported as described as result of an over-active imagination, desire for publicity or other reasons.
 - 3. A photograph of a lenticular alto cumulous is attached.
 - 4. The overall classification of this correspondence is CONFIDENTIAL)

4 June 1958

Dear Mr. Depart

The 24 January 1958 report by Mr. Concerning an unidentified flying object seen on Guam in September 1950 has been referred to this office for reply.

There are no reports from Guam of UFO's in September 1950. Also, an object of this reported size would have been seen by many persons or have been observed by radar. There are no radar or other reports concerning this object.

Sincerely,

LAWRENCE J. TACKER

> RDR-SAFIS-3 STYBCK-SAFIS-3

Dear Sir -

It might interest you to know that since the Guam sighting I have been shot with the rings about fifty times. As the report from the shot comes after the blackout I did not hear them and thought that I was suffering from some physical debility. As the incident in the park had exactly the same results (momentary blackout) I now know the real source.

On one occassion on Guam my car was completely off the road when I came to. Either they had given me a stronger charge or the ship was closer to me. I was unconcious at least five seconds. I reported this to my boss E. A. Fitzgerald of Denver, Col. and he can verify the above statement.

After this incident they reverted back to the weaker shots so I doubt that they were trying to do me any harm. The only disconcerting thing about the whole business is that the attack always came when I was on either a curve or a mountain road - but that could be coincidence.

I believe that these 'people' are here on a friendly exploration observation trip and will not leave without contacting us and establishing
some sort of a relationship. If they are unfriendly and bent on conquest
they will not want to contact us until the fire-works begin. The only
way to ascertain their motive is to attempt a contact - and I suggest
just that.

They know me and know that I am conditioned to the fact that they exist therefore I suggest that the stand myself drive to some isolated spot in the country, preferably Alaska, where I will try for a complete contact. I chose that to go with me because he appears to have a good grasp of the situation and also to have the necessary guts. He will not be in on the finale but I will need some one within fifty miles of me to whom I can relay information - if I get any.

I shudder when I think of what will happen if we do not attempt this contact and the Russians succeed in making one. Their leaders know as well as we do that these 'people' exist. At present we have the advantage but if these (the 'People') really want to contact the human race they will not too long on me and will probably take their to some other part of the globe.

In closing I might say that nothing will be accomplished with you hiding under the bed and me spoon-feeding information to you. The security of the country is in danger and the situation calls for direct and positive action.

Sincerely,

Quel-11

COMMEN	1. The			espondence						216/Bldg 263			

- 1. The inclosed correspondence is the latest of many contacts which the Air Force has had with Mr. This individual has submitted letters and reports to the Air Force since 1950, and they have all been concerned with a space craft which has been following him around.
 - 2. The general claims of the source are as follows:
 - a. The so-called flying saucer has been following him around since 1950.
 - b. The so-called flying saucers are inhabited.
- c. The weapon used by these space travelers is a "stunning ray" of some type which assumes an annular shape when fired.
- d. That for some unknown reason they have selected him (Mr. as a contact or guinea pig, and have stunned him with the ray some 50 times.
- 4. It appears that this source is either perpetrating a hoax for a joke or a more underhanded reason, or is a person in need of medical care.
- 5. The ATIC conclusion is that this report and the previous claims of Mr.

FOR OFFICIAL USE ONLY

6. It is suggested that in your reply to Mr. which you inform him that the information which he reported is in the hands of the proper Air Force department for analysis. Mr. which should also be informed that to date the Air Force has not found any positive evidence of the existence of interplanetary vehicles of any type; nor have any of the phenomena or objects reported and identified proved to be anything but man made items or natural phenomena, not hostile and dangerous except in ways which we understand and know (i.e. meteors and aircraft).

H. K. GILBERT Colonel, USAF AFCIN-4E

27 May 1959

Dear Mr.

Your letter of 21 April addressed to Wright-Patterson Air Force Base has been referred to this office to reply.

I am sure that you are aware that the U.S. Air Force is charged with the responsibility of investigating and analyzing all cases of unidentified flying object sightings. Further, it is, and has been, the policy of the Air Force to inform the public, through the media of the press, all we learn in pursuit of this program.

To date the Air Force has, in our investigation of many cases, uncovered no physical evidence which would indicate the presence of any extra-terrestrial space vehicles and/or beings, nor has there been any evidence that unidentified flying objects constitute any threat or danger other than the remote possibility of being struck by a meteorite, etc.

For your information, I am inclosing the latest Department of Defense fact sheets on this subject. They plainly state the Air Force position on this matter.

Sincerely,

Incl - 3
